

Taber® Abrasion Tester Model 5150: Description

CCSi features this high quality Taber® Abraser for evaluating resistance to abrasion of a wide variety of materials through the measure of volumetric loss of a specimen exposed to the action of a normalized abrasive medium secured to a rotating disc.

The Model 5150 Taber® Abraser allows the testing of two materials, either identical or dissimilar, simultaneously.

This is especially useful when performing a comparative analysis, and can virtually double the productivity of a single technician in a production environment!

The unique 'X' pattern of Taber® Abrasers is produced by the rotary action of the abrasive wheels. The wear action occurs as the wheels are turned by the rotating specimens. The axis of rotation of the wheels is displaced from that of the turntable, creating an abrasive 'sliding' action as the specimen rotates.

An area of 300 mm² (4.5 in²) is subjected to the abrasive action, and a complete circle on the specimen surface is abraded at all angles and direction of grain or weave, effectively simulating 'real life' conditions.

This high quality, durable instrument determines the precise point at which a specimen shows unacceptable wear. The Taber® tests are highly reproducible and repeatable and can be performed on myriad materials by simply changing the abrasive media or employing the available accessories!

Taber® Abrasers, by employing the available abrasive media and accessories, meet or exceed the requirements for many abrasion tests such as those described in ASTM, ISO, DIN, JIS, SAE, MIL, DoD, and a host of other national and international specification issuing organizations. A partial list of applicable test methods is available on the [Abrasion Test Methods](#) page.

Taber® Abrasion Tester Model 5150: Standard Components

Description	Quantity
Auxiliary Weights, 1000 g	4
Auxiliary Weights, 500 g	4
E-100-125 Specimen Holder	2
E-100-101 Retaining Ring	2
Hex Wrench for Retaining Ring	1
S-11 Calibrase® Refacing Discs	100
S-12 Long Handled Hand Brush	1
S-16 Specimen Plates	10
CS-10 Calibrase® Wheels	4
H-18 Calibrade® Wheels	4
Vacuum System & Attachments	1

Model 5150 shown with standard components.

Please visit the [Taber® Instrument Accessories](#), [Taber® Abrasive Media](#), and the [Taber® Specimen Holder](#) pages for more information regarding available accessories.
